

Week 4 Final Project: Funnel Analysis (SQL + Power BI)

Tools: SQL + Power BI	Duration: 7 Days
Dataset: Client Site Dataset.csv	

[Click to download](#)**Objective**

This is your final internship project. In this week, you will act like a real Data Analyst in a digital business company.

Focus of this week:

- Analyze user behavior using SQL
- Understand conversion funnel
- Identify drop-off points
- Build an interactive Power BI dashboard
- Generate business recommendations

Business Scenario

A digital company wants to understand user behavior on its platform.

They want answers to:

- How users move through the funnel
- Where users drop off
- Which channels bring valuable users
- Which devices perform best
- Which regions generate more revenue

You are hired as a **Junior Data Analyst** to solve this.

Funnel Concept

Your analysis will follow this funnel:

Step 1: User Visit

Step 2: Session Start

Step 3: Product View

Step 4: Action (Click / Interaction)

Step 5: Purchase

Goal: Find where users drop off.

Your Tasks

PART 1: SQL

Task 1: Data Exploration

Write SQL queries for:

1. Total rows in dataset
2. Unique users
3. Unique sessions
4. List all event types

Task 2: Funnel Stage Analysis

Analyze each funnel step:

1. Count total events by type
2. Count users per event type
3. Find conversion from view → purchase

Task 3: Revenue Analysis

1. Total revenue
2. Revenue by region
3. Revenue by channel
4. Revenue by device

Task 4: Business Insights Queries

1. Top 5 users by revenue
2. Best performing channel
3. Highest revenue region
4. Device with highest conversion rate

Task 5: Drop-off Analysis

- Where users drop the most in funnel
- Event type with lowest conversion

Part 2: POWER BI DASHBOARD

KPI Cards (Top Section)

- Total Users
- Total Revenue
- Total Events
- Total Purchases

Required Visuals

1. Funnel Chart (MAIN VISUAL)

User Journey Funnel:

- Visit
- Session Start
- Product View
- Click
- Purchase

2. Bar Chart

Revenue by Channel

3. Column Chart

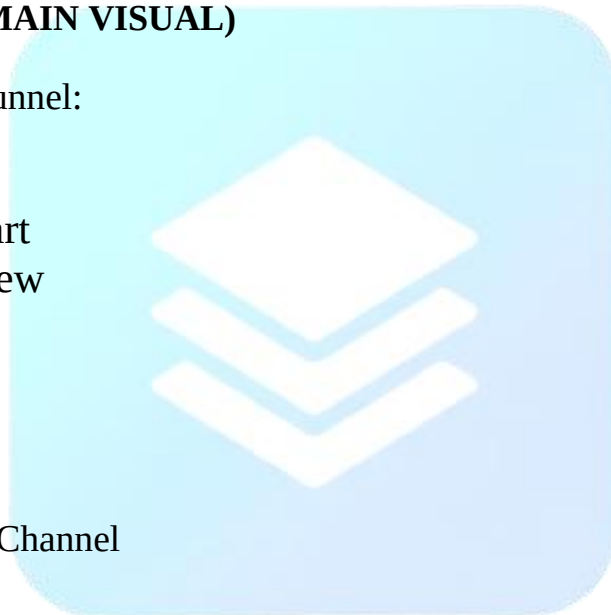

Revenue by Region

4. Pie Chart

Device Distribution

5. Line Chart

Revenue Trend (Event Time)

INSIGHT PANEL (MANDATORY)

Write:

- Biggest drop-off point
- Best performing channel
- Most valuable user segment

PART 3: BUSINESS INSIGHTS (FINAL THINKING)

Write in simple language:

Required:

- 5 SQL insights
- 5 dashboard insights
- 3 business recommendations

FINAL GOAL OF INTERNSHIP

By the end of Week 4, you should be able to:

- ✓ Understand user behavior
- ✓ Analyze funnels using SQL
- ✓ Build business dashboards in Power BI
- ✓ Generate real business insights
- ✓ Think like a Data Analyst

Important Instructions

1. Your GitHub repository must be public.
2. Your README file must be properly written.
3. Your LinkedIn post must include your GitHub project link and must mention LogicStack.
4. Do not upload incomplete work.
5. Do not copy another intern's README or LinkedIn post.
6. Use your own words in observations.
